

Community Market Planning Grant RFP

Next Generation Food Pantries

WHAT ARE COMMUNITY MARKETS?

Community Markets are large-scale, multiday food pantries that are equity centered, community led and help uplift community by offering resources & service navigation. Community members will be able to browse, touch and choose products while also receiving other services (i.e. CalFresh, rental assistance, child care referrals, etc.)

WHY COMMUNITY MARKETS?

Community Markets are an opportunity to increase both the quality and quantity of service provided to communities. The Community Market Grant RFP serves as a portal for partners to express their interest in transforming their current food service operation into a Community Market.

HOW WILL IT WORK?

The Community Market Planning Grant RFP will be used to select partners who would be a best fit for a community market transformation based on their ability to convert a given space and that space's location, in addition to other factors such as ability to grow 500 new UOS within the first year.
